

Quick Guide My Validation Results - UFS App

This app allows you to get information about the validation results of combining the Single Data Return (SDR) enrolment data, Industry Training Register (ITR) participation data and the data submitted through the Mixed-mode (off-job) Workspace2 (WS2) template. This app also includes the latest data submitted via the Pathway to Work WS2 template and the validation error(s) associated with them.

Examples of what you can discover

- View data validation results associated with Mixed-mode (off job) and Pathway to Work WS2 templates.
- Identify validation issues that arise when combining the data submitted via ITR, SDR and Mixed-mode (off-job) WS2 template.
- Drill down into individual records to view the reason behind the validation failure.
- Identify data accuracy issues.
- Identify the submission ID and date submitted via the Pathway to Work WS2 template.

Things to note

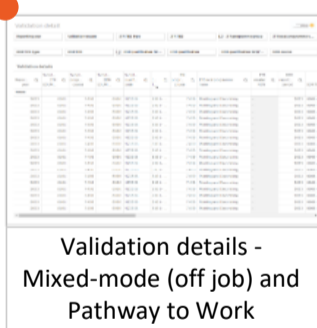

- The summary sheet provides a high-level overview of the validation results.
- The detailed sheet allows you to carry out in-depth analysis. It should be noted that some validation results are signalling that a learner is not appearing in both ITR and SDR. For example, some learners in a particular programme may not have done off-job training.
- The data in this app is only available from 2023 onwards.
- Latest data from ITR, SDR, Mixed-mode (off job) WS2 template and Pathway to Work WS2 template is used for validation.
- If a change to the ITR, SDR and/or WS2 templates is submitted, the data in the app will be refreshed overnight.
- The data from SDR is limited to source of funding (SoF) 11 - ITO Off Job Training (Non-degree Delivery).
- The ITR data is as at the end of the previous day. Any information submitted to the ITR will be refreshed in the app overnight.
- ITR programme group and SDR qualification NZSCED make use of hierarchies. Selecting the top-level of one of these filters makes available the next level of the hierarchy.

Information provided by each sheet

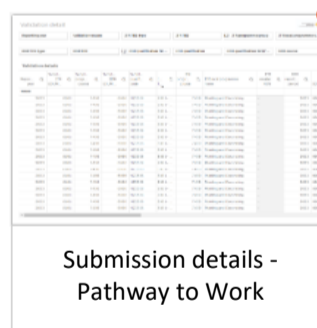

Overall summary of the validation results.

Validation results of combining the SDR enrolment data, with ITR participation data and the Mixed-mode (off job) WS2 template data. This sheet will also show duplicate records in the Pathway template submission.

Pathway to Work WS2 template submission details.

Data Definitions

Take a look at the data definitions sheet in the app for more information on the following fields:

- Complex arrangement
- Number of days prior
- Reporting year
- Template name
- Date and time of submission
- Pathway validation
- Study type
- Validation category
- Mixed-mode validation
- Pathway verified
- Submission ID
- Validation reason
